Hello!

We are excited to share with you Lift, Logitech ergonomic vertical mouse—crafted to fit naturally in your hand and help you #liftyourselfup when the desk life gets you down!

The vertical shape takes pressure off your wrist as you work. It also promotes a more natural posture in your hand, forearm and upper body.

Logitech Lift is a silent mouse, with a modern design, available in graphite, rose and off-white. Graphite is available in a left-handed option. The Mac version of Lift was developed & optimized for use with Apple's Macs.

Lift's sustainable design makes it a choice you can feel good about. A portion of Lift's plastic parts are made from post-consumer recycled (PCR) plastic - 70% for graphite and 54% for rose and off-white.

Enjoy your LIFT!
